

Event: Tilia Homes Litter Pick

Framework Pillar: GreenEthos

Project: Community Wood in Midlands Region

Date Range: 28th July 2023

Social Value Achieved: £270.88

As Go Green drives forward our GROWW Framework, we are always keen to work in collaboration with our customers to make an impact in their local communities. We were pleased to partner up with Tilia Homes recently to carry out a litter pick near one of their sites.

The Litter Pick

Montgomery Grange is one of Tilia's sites based within their Central region; on 28th July, 3 members of Tilia Homes, including the Montgomery Grant Site Manager, and 2 members of Go Green walked from the project site, into the town of Market Drayton to complete a litter pick. After 2 hours, the team dropped off the rubbish bags at the Town Hall where the local council had agreed to collect.

Partnership

At the heart of what Tilia Homes do, they create communities and believe strongly that those communities should come first. By engaging with Go Green, an active waste management partner, Tilia Homes can extend their reach of community and social value work through Go Green's own Sustainability GROWW Framework, the litter pick falling nicely into our GreenEthos pillar which focus' on safeguarding the planet by pushing forward environmental values.

"It was great to partner up with Go Green Ltd and carry out a litter pick with the site team for the community of Market Drayton , the town where we are building. Thanks to Haley Coggan and Alexandra Curran for taking the time to organise. Great job."

Jack Pennells

Senior Site Manager, Tilia Homes
